Values in parentheses show the difference between the selected location and the Boise Airport Weather Station (43.56704°, -116.24053°). The differences were calculated by subtracting the values for the Boise Airport from the values for the location you selected. For example, (−2) in a temperature variable row means that your location is 2 degrees colder than the Boise Airport.

The values shown are the mean for that variable +/- the standard deviation, which is a common metric for measuring the variability in a set of data.
